## PROJECTS

### **Handyman Application (Final Year Project)— *Detail***

Handyman Application provides users with a fast and reliable means to contact best odd-jobbers around them. In Pakistan, for domestic jobs the selection of blue-collar workers has always been a challenging task. The Main focus of this survey is to create our own mobile based application where people can contact handymen. Handyman is a term used to describe technicians,including a Carpenter, AC Mechanics, Plumbers, Car Mechanic, Electricians and Painters.

### **Govvor Voting System (www.Govvor.com)— *Detail***

Govvor is a live political platform. Weekly elections are held per city, state, country and global level. Every Week there will be a new King or Queen to the entire world, as well as Prime Minister to the country, Senator to the state and Mayer to the city. People issue bills from their profile and run for elections. Every one can vote and run for elections and become the king of the world. These are real votes which cost 4.99\$ per vote. Once elected, you will join the government and your bill will be in the constitution. Furthermore, after you get elected you can claim your bill. There is an interactive fund constitution so your claim can go upto 450\$.

### **Live Email Networking (www.Aggnett.com)— *Detail***

Aggnet is a live email networking system. Where people can find

professionals according to their needs. There are different kinds of clubs and in every club there are different types of stores and in every store there are two kinds of people one is store owners and second is creators. people get registered in specific stores. Once you get registered you can contact anyone in this store through email and find the best one to do your job.
