

BAGOBAN Chitrasen

Information Technology Consultant

As an IT Digital Consultant, I partner with businesses to create and execute digital strategies that drive growth, improve customer engagement, and optimize operational efficiency. My approach combines deep market insight with innovative solutions to help clients navigate the digital landscape and capitalize on emerging opportunities.

I work closely with clients to align their digital goals with overall business objectives, ensuring that every initiative contributes to long-term success.

Accomplishments

In the fight against COVID-19, one of the most critical tools is accurate data tracking. As the pandemic swept across the globe, I took the challenge to develop a groundbreaking new tool to help track the spread of the virus. I am proud to announce that I was the first person to build a COVID-19 user tracker in Mauritius.

This tool has been instrumental in helping individuals stay informed about the latest developments in the pandemic and providing them with useful information to protect themselves and their loved ones.

The user tracker is designed to provide real-time updates on the number of cases and deaths, as well as the latest news and guidance from local health authorities.

One of the key features of the user tracker is its ability to track users' movements and alert them if they have come into contact with someone who has tested positive for COVID-19. This feature is crucial in helping to contain the spread of the virus and prevent new outbreaks from occurring. As the first person to develop a COVID-19 user tracker in Mauritius, I am proud to have contributed to the local effort to combat the pandemic. It is my hope that this tool will continue to help keep people informed and empowered to take the necessary steps to protect themselves and their communities.

Experience

Nov 2023 - Present

Pixel Plus LTD | Mauritius (*Torekko Rebrand*)

Information Technology Consultant

- Assisted in development of long-term strategies to grow department and resources.
- Reviewed and assessed architecture design, implementation, testing and deployment needs to identify project requirements and costs.
