Experience

RealPage | Software Engineer | Remote   Jan 2022 — July 2024

- Contributed to the corporation's polyglot content management system and other in-house, full-stack applications: spearheaded the architecture of reusable website themes; built client configurable UI components utilizing JavaScript frameworks; removed legacy code (e.g. jQuery, Modernizr); ensured compliance with UX standards and accessibility best practices
- Peer-reviewed numerous pull requests of cross-functional teams in different repositories
- Tracked user stories in Jira; logged hours; fulfilled frontend / backend requirements
- Debugged issues (e.g. console warnings, slow site speed) across browsers, devices, and operating systems with HoneyBadger, BrowserStack, Axe, VirtualBox and other dev tools

G5 Search Marketing | Software Engineer | Bend, OR   Apr 2013 — Dec 2021

- Performed release management: created RC, combining multi-language branches together; resolved merge conflicts; wrote testing and history notes; deployed to staging and production environments using Kubernetes; git tag upgraded versions; executed necessary hotfixes
- Participated in backlog grooming, daily scrum, faculty meetings, and tech conferences
- Onboarded and trained new in-office, remote, and off-shore employees and contractors
- Responded to PagerDuty alerts during 24/7 on-call schedules; escalated appropriate incidents

Projects

Alpine Reusable Theme | Storquest Self Storage | www.storquest.com
- Collaborated with the Product Manager of UX & Design; most widely adopted theme at G5
Cinemagraph and Video Widget | Morgan Properties | www.morgan-properties.com
- YouTube API integration; onError fallback support; transparent background gradient overlay
